PROJECTS

Smart Sewage Alert System

- Designed and built a hardware-based sewage monitoring system that sends automated alerts using an Arduino microcontroller and a GSM module.
- Implemented priority-based SMS messaging to warn authorities early and help prevent sewage overflow.
- **Tools:** Arduino, Float Switch, GSM Module, Arduino IDE

Robotics Learning Educational Platform

- Developed a hardware robotics kit that lets learners practise programming concepts through hands-on experimentation.
- Built the robot using 3D-printed parts, an ESP32 controller and stepper motors.
- **Tools:** ESP32, Stepper Motors, 3D Printing
